A splash guard sheet is included as standard

solarBRUSH Cleaning where the robot stops.

Not every system can be cleaned with a robot – edges, ridges, partial areas. This is exactly where the solarBRUSH comes in. Our electricPV hand brush cleans quickly, thoroughly and gently on resources – without high pressure, without chemicals, without compromise. Withup to 70 % less water consumption compared with conventional systems, the work is economical and resource-friendly.

Because the solarBRUSH is battery-powered, the power supply is housed in an ergonomic backpack that also offers storage space. Thisallows more than 4 hours of work with full freedom of movement – and a total system weight of only 4 to 5 kg means you can workwithout fatigue. Water and power supply run cleanly through the inside of the pole – no disruptive hoses, no cable clutter. The workingwidth can be extended modularly from 600 mm to 800 mm, and the brush rotation direction can be controlled directly from the groundat the push of a button.

General data		Brush systems 600 / 800 mm	
Width	± 600 / ± 800 mm	Brush width	± 600 / ± 800 mm
Length	± 400 mm	Brush diameter	± 150 mm
Height	± 180 mm	Brush rotation	± 360-380 rpm
Total weight	± 4 / ± 4,6 kg		
Compatible telescopic poles	GARDINER: SLX & SUPER MAX Art.-No.: 940201.000000 and others depending on the connection (reach > 12 m possible)		

Energy supply		Water supply	
Ion battery	36 V nominal	Water volume	max. 200 l / h
Battery life	± 5 h	Operating pressure	Low pressure

Art.-No.: 940200.000000

> FOR OPTIMAL WATER TREATMENT, WE RECOMMEND THE BRUSH IN COMBINATION WITH OSMOBIL PRO X
Art.-No.: 940202.000000
