# New Walk-Behind Scrubber-Dryer

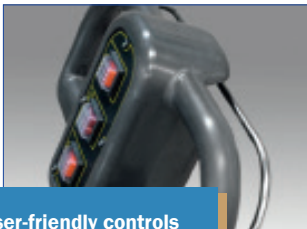

# NANOScrub

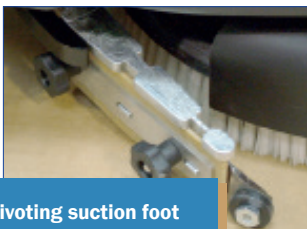

Just 40 – 48 cm  
ground clearance

Easy access

User-friendly controls

Pivoting suction foot

11 L solution tank  
and 12 – 13 L waste  
water tank capacity

## Advantages:

- **Long duration – maintenance-free 75 Ah battery**
- **High area efficiency**
- **Waste water tank easily removable for cleaning**
- **Waste water drain hose for quick emptying of tank**
- **Excellent price-performance ratio**
- **Tool-free brush change**
- **Freely suspended brush adjusts to underground**
- **Excellent suction power**

VERY GOOD  
CLEANING RESULT

HIGH EFFICIENCY

UNIVERSAL APPLICABILITY

The battery-operated scrubber-dryer allows extensive freedom of movement. The NANOScrub can be used universally thanks to its agile and simple application and compact dimensions.

## Square meter by square meter

Up to 1.250 m<sup>2</sup>/h per battery load can be cleaned with the NANOScrub.

## Easy operation

With its maintenance-free gel battery, the user-friendly controls and simple exchange of bayonet-locked brush, the NANOScrub machine is easy to use.

## Remove the dirt!

The dirty water drain hose is easy to operate and ensures convenient waste water disposal.

## It knows where to go

The robust suction foot is automatically pulled in the right direction, which leads to outstanding drying results.

## Preferably curvy

90 degree curves are a speciality of the NANOScrub. Even here waste water is absorbed without residue.

## Small but excellent

Compact, powerful and efficient! Replace your mop and do your cleaning with NANOScrub!

# NANOscrub

**Perfectly suitable  
for small  
and heavily furnished  
areas such as ...**

## **Universally applicable**

The NANOscrub scrubber-dryer is perfect for small and heavily furnished areas. Manoeuvrable and small, at the same time powerful and thorough with 100% freedom of movement.

With the adjustable flow rate of the cleaning solution (automatic start/stop function with the aid of a solenoid valve) an individual setting for each surface is possible.

When it comes to thorough and easy cleaning and maintenance of floors in confined spaces, the NANOscrub is an excellent device.

Thanks to the large 75 Ah battery it can run for up to 120 minutes on one battery charge.

Fully charged and ready to use within 12 hours.

Made for a wide range of applications with pads and brushes.
